

STANDARDS FOR NURSING STUDENTS

Responsibilities and standards in nursing practice are determined by the Board of Nursing, national accreditation guidelines, and clinical agencies. Additionally, as described in various clinical evaluation tools and course guidelines, students must be able to provide safe patient care.

Technical Standards for Nursing Practice

Nursing is a practice discipline and successful completion of the nursing program requires that students demonstrate ability to effectively and safely perform several essential skills. All students are assessed in practice labs and clinical practicums throughout the program to confirm adherence to the technical standards, with or without accommodation.
